**Please make sure your bin is out the night before collection**

# Your bin schedule has now changed!

From February 4, all bins will now be collected fortnightly. Previously green bins were collected every four weeks, yellow bins were collected fortnightly and red bins were collected weekly.

Now your red and yellow bin will be collected on the same week, your green bin will then be collected on the following week.

The table on the back reflects the days for each town and how the bin collection will work.

Council has implemented fortnightly collection to help curb waste going to landfill, with every tonne of general waste Council pay an EPA levy of \$78.

The more waste we can shift from going into red bins the better it is for the environment, Council and residents.

To find out more information on what goes in which bin visit <https://www.whichbin.sa.gov.au/>
